

2 HEAD CORNER ROUNDING

SEMI-AUTOMATIC COVER
CORNER ROUNDING UNIT
Model 2HCR

2 HEAD CORNER ROUNDING, the Master originates the two head semi-automatic unit. Sturdily built, easy adjusting : by introducing the covers the 2 heads come down to round the corners. The machine will meet with the needs of the small and medium production.

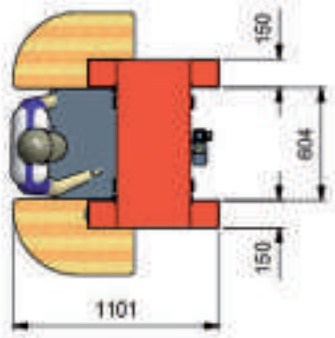

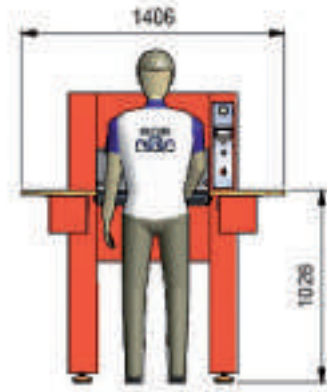

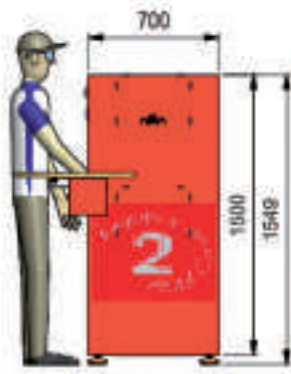

Highlights

- Simplicity of Operation
- Quick and Easy Makeready
- Easily Moveable
- Reduced Floor Space

Operation

Covers are insert manually into the corner rounding station. In two passages the machinery allows the perfect rounding of the sides of the 4 corners. The unit is equipped with the heating system which soften the glue before the corners will be rounded. Corner pressure time can be adjusted by simply operating on the display .
